

OSPREY ADDONS™

Customize and protect your pack with Osprey's full line of AddOns.™ For the full lineup, please visit your local Osprey retailer or visit our web site www.ospreypacks.com.

PACK CARE

Osprey recommends Nikwax™ products for pack care. For complete instructions on cleaning your pack, visit : www.ospreypacks.com/PackTech/PackCare

Your pack is an extremely durable product built for years of use and abuse. However, some basic procedures will ensure that your pack holds up optimally.

- After each trip be sure to clean out your pack thoroughly.
- If it's wet, hang it to dry.
- Loosen all the straps.
- Wash your pack every now and then. (Do not immerse travel packs with our High Road™ Wheeled Chassis.)

GUARANTEE

At Osprey, sustainability is designed into our packs, which are built to last a lifetime and backed by a superb guarantee, no matter how hard you are on your gear. Visit www.ospreypacks.com for details.

KESTREL / KYTE KEY FABRICS

Key Fabrics

- 420D nylon packcloth
- 210 double diamond nylon

SHARED FEATURES

AirScape™ Suspension

Every Kestrel/Kyte Series pack features the AirScape™ backpanel consisting of mesh covered, 5 mm ridge molded foam providing excellent ventilation, comfort and load support. A peripheral LightWire™ frame provides supreme carry and performance on all save the minimalist Kestrel 28.

Torso Adjustable Harness

Two torso adjustable sizes provide exceptional fit and adjustability. To adjust torso sizing: **A** Loosen load lifter straps at top of harness, **B** locate arrow icon and slide a hand between backpanel and harness to separate the hook and loop closure, **C** slide harness into position using arrows as a guide, **D** press firmly to re-engage closure.

Gender Specific ErgoPull™ Hipbelt

All Kestrel/Kyte Series mesh covered, perforated foam fixed hipbelts use our exclusive ErgoPull™ (Kestrel 68/58-Kyte 66) or modified straight ErgoPull™ design (Kestrel 48, 38, 32, 28-Kyte 46, 36). To operate the ErgoPull™, loosen the webbing enough so you can connect the center buckle. Then grasp the loose ends of the webbing on either side and pull evenly in and across with both hands at the same time.

Hipbelt Webbing Strap Retention

A sewn-in elastic strap near the buckle functions as a strap keeper system for excess hipbelt webbing. Fold and tuck extra webbing through the loop as needed to retain.

External Hydration Compartment

Located between the harness and main body on the backpanel is an exterior access hydration compartment. A) Locate the H2O icon and loosen load lifter straps. B) Place reservoir in the compartment prior to loading pack using the sewn-in hanger to hold upright. C) Route the hose through the elastic routers on the left or right harness as preferred.

Integrated Raincover

To operate, **A** locate the raincover icon near the base of the pack and unzip raincover compartment, pull raincover from compartment and slip over top and bottom of pack; **B** tension into place using the cord lock at the bottom of the raincover. Reverse this process to return raincover to compartment. To remove the raincover altogether, unfasten the hook-and-loop strap from the cord loop. Note: To prevent mildew, remove raincover and allow to dry entirely after use in the rain.

Stow-on-the-Go™ Attachment System

To operate: shorten trekking poles to a safe, manageable size, **A** locate the elasticized cord loop on the lower left side of pack and pull loop away from the side pocket, inserting the basket end of your poles. **B** On the left harness strap locate the trekking pole icon, **C** grasp the cord lock beneath the fabric patch and pull up on the cord to open the bungee loop. Place pole handles in the loop and tighten to secure. Reverse to remove.

Tool Attachment

Each Kestrel /Kyte Series pack features dual ice tool loops and three position bungee tool tie-offs for secure tool attachment and transport. These clove hitch style bungees feature Osprey’s exclusive Y-Clip allowing you to loop tool handles quickly, with a cord lock to secure. To use, **A** Loosen the cord lock and route handles through the bungee. Tighten the cord lock, nesting closure into the Y-Clip to secure. Reverse to remove or change position.

Reverse StraightJacket™ Compression System

This reverse strap system **A** serves a dual purpose allowing you to compress loads for a better, more balanced carry while providing retention straps for versatile side carry options. Compression can be engaged across the front of the pack using opposing female buckles to compress partial loads and secure unusual items such as snowshoes etc.

External Pockets

Every Kestrel /Kyte Series pack features a stretch woven front pocket, dual stretch woven side pockets and dual zippered hipbelt pockets adding capacity and keeping you organized on the trail.

Removable Sleeping Pad Straps

Kestrel/Kyte Series packs feature removable sleeping pad straps allowing you to easily attach a pad, tent or other items to the outside of your pack. [Not available on Kestrel 32/28]

Hydraulics™ Reservoir

Add an Osprey Hydraulics™ 2 or 3-liter hydration reservoir to your pack for stable, efficient, on-the-go water management. For more information, please visit your local Osprey retailer or visit www.ospreypacks.com.
